Building a better future.

Superform is a family owned company based in Pincher Creek, AB with a vision of building a better future. We produce high quality and sustainable building products for our customers providing them the peace of mind and the confidence that their projects are built efficiently, reliably, and with the ability to withstand even the most extreme elements Mother Nature has to offer. Our insulated concrete wall system keeps your home warmer in the winter and cooler in the summer, keeping you comfortable while reducing your energy costs.. Whether you need to stay safe or just stay comfortable, SuperForm ICF protects you're family. **You will enjoy the benefits for decades to come.**

Benefits and Features

Unmatched Comfort

Thick continuous insulation panels on each side of the concrete wall create a better living experience. You will love the quiet, draft free, experience you get from living in a SuperForm ICF house.

Energy Efficient

The combination of thermal mass, an airtight structure, and zero thermal bridging allows for a year-round energy savings of up to 60% and can easily meet Net-Zero Energy requirements.

Design Versatile

Designed to meet any forming requirements from foundations to the eaves, ensuring your ICF home can be designed and built to suit your dreams. With ties every 6", fastening interior/exterior finishing's of your choice has never been easier.

Sustainable

SuperForm ICF walls are built with a combination of Concrete and an Insulation that doesn't break down or lose R value over time. Your building will have infinite durability and lower maintenance during its lifetime. SuperForm ICF is 100% rot and mold/mildew resistant.

Disaster Resilient / Strong

SuperForm performs at such an incredible level making it an easy choice for your build. Due to Concrete in SuperForm ICF curing 30% stronger than conventionally formed concrete, it handles everything thrown at it such as fires, tornados, hurricanes, or high winds up to 400km/h(250mph), SuperForm ICF will stand the test of Mother Nature. Saving homeowners and building owners the stress of rebuilding their projects.

A Complete Package

The SuperForm ICF system completes all 6 major building steps in one process. SuperForm ICF incorporates concrete, steel reinforcement, insulation, air barrier, vapor barrier and attachment points into one easy step, saving significant time and resources. 100% of SuperForm ICF components are manufactured in house in Canada and the USA meeting international building codes.

- ▶ Forming System ●
- ▶ Wall Structure (rebar & concrete) ●
- ▶ Continuous Insulation ●
- ▶ Air Barrier ●
- ▶ Vapour Barrier ●
- ▶ Interior & exterior attachment points ●

Specs

Tie Flange Thickness: **Up 7.25mm (5/16")**
Tie Spacing: **6"**
Wind Resistance: **Up to 400km/h (250mph)**
Fire Rating: **4 Hours**
Flame Spread: **< 10**
Smoke Development: **< 300**
Sound Class Rating: **55**
R Value: **24 stand alone**
R Value Performance: **Over a R40**
Up to 22 trees saved by using ICF vs wood frame
ICC # ESR-3466
QAI # B1051-1
